Matice
M6
4x

Krytka
12x

6.

Pružina
krátká hrubá
2x

Pružina jde nasadit obtížněji. Je potřeba otevřít úložný prostor - úplně, nasadit pružinu do zadního otvoru a pomocí kombinovaných kleští nasadit druhý konec pružiny do předního otvoru. Stejně postupujeme na druhé straně mechaniky.
